

BIG PATRIOTIC CELEBRATION SET FOR THURSDAY, JULY 29 AT WAINWRIGHT

Red Letter Day Arrangement Being Pushed Ahead

Special Trains and Excursion Rates

Unless the plans being formulated mis-carry, and it is not conceivable that plans in the hands of such capable committees, will do so, or Jupiter Pluvius steps in, the Patriotic Celebration this year will be indeed a red-letter day in the era of Wainwright's existence.

The celebration committee, which consists of probably the aggregation of business men obtainable, is working hard to achieve this result, and they are sure being supported in the greatest possible manner by the subscription lists which already total nearly \$700.

The program of the day will include such attractions as trap shooting, horse racing, baseball, athletic events, etc., and the proceedings are to be enlivened during the day by both the Town Band and the Edgerton Band.

Mrs Louis Boilette left hurriedly for Edmonton on Monday upon receiving the sad news that her father was dying from cancer. We extend our sympathies.

While the storm was at its height on Saturday evening, what might have proved a serious conflagration was only narrowly averted by prompt action on the part of the town constable, when the stove-pipes at the home of Mrs McMillan on Second avenue were in an overheated state.

MR JOHN FOSTER PASSES AWAY AT RIPE OLD AGE

It is our duty this week to chronicle the passing away on Sunday morning last of Mr John Foster, at the age of 74 years. The deceased who was born in Ontario, came west from the Algoma district, in 1914, and homesteaded about ten miles from town.

Last fall the family moved into town and since that time Mr Foster has been ailing with heart trouble, which was finally the immediate cause of death. Among those who are left to mourn their loss are the widow and nine children, and we join with the many friends of the family in extending our heartfelt sympathies to them in their bereavement.

The funeral services were conducted at the Methodist church, to which denomination the deceased was a faithful adherent, on Monday afternoon, the sacred edifice, which was tastefully draped for the occasion, being well filled with large numbers of sympathisers and townsmen. The Rev R. Swenerton, the pastor, assisted by the Rev H. Assiter conducting the last rites.

The local L.O.L. also assembled in a body to pay respect to the remains of their late brother, and conducted the portion of the service at the graveside peculiar to their organisation.

The pall-bearers were Messrs Armstrong, Bowman, Gregory, Itesed, Rose, and Mills and the arrangements were in the hands of Small Bros.

In the evening a big dance is being arranged for in the Elite Theatre as well as special feature reels of pictures, and taken all in all there should not prove a dull moment from the time the trap shooting starts in the morning until the last weary celebrator wends his tired way homeward.

Word has been received from the surrounding towns that large numbers are arranging to be here, and with the special trains and a half-fare excursion rate for this trip the incentive is stronger still.

Provision will be made for feeding and refreshing the hungry, and rest rooms prepared, and with the vim imparted by the strenuous working of the different committees, we repeat, that given fine weather the Patriotic celebration to be held here on June 29th must prove a decided success.

IRMA BOY WRITES HOME TO PARENTS

Still another epistle reaches this district from the Old Country this time from the pen of Lance-Corporal R. Wilbraham, of Irma. After describing his journey over, the writer states that he is at present in the South of England, and that the G. T. P. contingent is in the same vicinity.

Another brother of the (ance) corporals has now donned the uniform, having joined the 190th Battalion at Winnipeg, this making in all four sons whom Mr G. Wilbraham, of Irma, has serving King and country, in addition to a son-in-law and a brother in England who is a reservist. All honor to the whole bunch of them, and "may their shadows never grow less."

RECEIVES EARLOOM AT THE AGE OF SEVENTY YEARS

The successor to Earl Kitchener's title is his eldest brother, Colonel Elliott Chevalier Kitchener, who, notwithstanding the fact that he is nearly 70 years old, has been serving in the southwest African campaign. He is now on his way home.

Col. Kitchener formerly commanded the West Indian Cepot. He was mentioned in the dispatches for his services in Burma in 1891, and in the same year again received official commendation for his services as chief transport officer of the Manipur expedition. He was born October 5, 1846.

The second heir is Col. Kitchener's son, Commander Henry Franklin Chevalier Kitchener, R.N., born in 1873.

Kitchener had two sisters in America, Lady Gillespie, of San Diego, Cal., and Mrs Keith, widow of Lieut. Col Keith, of the King's Guards, whose home is in Victoria, B.C., but who is probably now in California.

Mrs G. H. Beaudry will not be receiving on Thursday nor again this season.

PRIVATE E. F. MOTT

Telegraphic dispatches on Monday last gave the news that Pte. Frank Mott had been reported as dangerously wounded in action "somewhere in France." While extending our sympathies at this misfortune, we express hopes for his speedy recovery.

Another local name in the casualty list also was Trooper W. T. Steele, of Clarke Manor, who while with the 3rd C. M. R.'s was dangerously wounded in action.

The following letter has been received by Alex. Nesbitt, of town, from Pte. E. F. Mott, who is "doing his bit" in Europe:—

Belgium May 21st, 1916.
Dear Alex,
There are lots of happenings here that would no doubt be of interest to you but we have become so accustomed to things in general that everything seems commonplace, even a heavy bombardment is such a usual occurrence that it doesn't create a great deal of excitement any more. We have been in some hot places during the last three months but have always come through them.

I get wishing sometimes that the war was over but I must admit that the end doesn't look very near, both armies are so strongly entrenched and the system for bringing up reinforcements to any threatened position is so perfected together with modern guns and an unlimited supply of ammunition makes an advance on a large scale an utter impossibility. Even a small engagement, the attacking party is always a very heavy loser so I believe it will be long drawn out war.

I have some great times now and then prowling around "No Man's Land" at night, it is interesting and a little exciting at times keeping watch of Fritz and seeing that he doesn't encroach on Canadian soil.

So far Elmer Jackson and Gordon Newport are the only Wainwright boys that have been seriously hurt. Jones got shook up some the last bombardment we had, but he is back in the outfit again. Norman Cook and Bob Hunter are busy these days instructing classes in the use of the machine guns. Geo. Harper has quit the signaling section and is driving the medical cart. He has a mule which he calls "Maud" and you would think he was a genuine Mos-sourian to see him driving down the line.

E. F. Mott.

Mrs L. P. Lally leaves tomorrow for a holiday trip to Banff.

Wedding bells were ringing at the Presbyterian manse on Monday morning last when the pastor performed the nuptial rites between Miss Florence C. MacGilvray and Elsie LeRoy Singer, both of Buffalo View. Bud Simmerman and Mrs Murphy were witnesses.

SEVEREST STORM OF THIS SEASON VISITS THE TOWN

On Saturday last what was probably the severest storm experienced in years visited town and several of our citizens are bemoaning the fact.

At one time the wind velocity reached over sixty miles per hour, and it was during the height of the gale which was accompanied by sheets of rain that several roofs on smaller buildings were partially torn off.

The roofing on the Elite Theatre stood the test until very late Saturday night or early Sunday morning, but by daylight it was in such shape that workmen had to attend to it at once to save the whole from becoming a wreck. Several windows were blown in also, and Monday's pleasant weather was sure a big relief from the continual 51-hour storm.

CENSUS TAKING NOW IN PROGRESS IN DISTRICT

The quinquennial census taking of the provinces of Saskatchewan and Alberta is now under way, the census commissioners having appointed enumerators some days ago. The older provinces of Canada have only a decennial census but in accordance with the Autonomy Acts the provinces of Alberta and Saskatchewan enjoy a count every five years. This is due to the rapid changes in population which have taken place in Western Canada. The provincial subsidy on the basis of population is fixed by this census and it therefore becomes an important matter to the provincial exchequer.

Mr Orlando Bush has been census commissioner for Northern Alberta, and he recently visited Wainwright and appointed census takers for the adjacent territory.

COMPETITIONS IN SHEEP WOOL AT EXHIBITION

War has brought about a demand for wool which unprecedented in history, and has given a stimulus to the sheep breeding and wool growing industry throughout the world. In order to encourage Alberta to do its bit towards providing for the needs of the soldiers by producing the best quantity of wool, the Edmonton Exhibition Association has arranged three competitions for the summer exhibition, July 10th-15th, for the best fleece of long wool, the best fleece of medium wool, and the best fleece of fine wool, with three generous prizes in each competition. Complete fleeces in the grease alone will be accepted.

Exhibitors must be residents of Alberta. Manufacturers and dealers are excluded from this competition which is for sheep-breeders alone. Arrangements will be made to dispose by auction of all fleeces not reserved by the exhibitors, at the close of the fair.

District Court will be held here on June 21st, when Judge Taylor will hear arguments in several debt cases.

HOLMSTEAD SCHOOL REPORT

The following is the report of the Holmstead S. D. 1816 for the month of May:—

Perfect attendance:— Louise and Rob Patterson, Grace and May Stouffer, Ralph Dockstader. Those obtaining over 75 p.c. Grade 1, Douglas Jackson, Harry Stouffer. Grade IV, Rob Patterson, May Stouffer. Grade V, Louise and Eddie Patterson. Grade VI, Lexie Morrison. Grade VII, Minnie White, Una Carl, Ralph Dockstader. Gd. VIII, Grace and Clayton Stouffer.

Miss B. E. Simpson, teacher

TOFIELD MAN WRITES PRIZE WINNING LETTER

The following letter written by J. Brown, of Tofield, gained the first prize in the recent contest put on by the Woodland Dairy of Edmonton, for the "Finest class of Cow for the Farmer."

Dear Sir:—The cow that I should like for my farm would be one from a Shorthorn milking strain, as then I should hope to get each year a good calf, that would either grow into a profitable steer or, if a heifer, into a good milch cow. I should like to know if her sire came from a milking strain. Her general appearance should be smart, active and vigorous looking, in no way vicious or irritable. The points I should look for, a somewhat long face, broad forehead, large, full, mild and bright eyes medium ears, large mouth and nostrils, thin neck where it joins the head, good deep chest, broad back, well sprung ribs giving a large barrel, a long thin tail ending in a switch of fine silky hair, short legs, with straight shanks. Large deep wide udder firmly attached, coming well up behind and well forward in front quarters free from any fleshiness, large teats evenly placed, large, crooked and branching milk veins, milk wells large and numerous; skin should be loose and have an elastic feel about it, coat soft and mossy.—

W. B. MOFFAT

After a service of over five years as manager of The Wood-Wainwright Company, who are holders of two of the largest farming interests in the West, Mr W. B. Moffat has decided that he is entitled to a change, and to gain such he is resigning his position. He will leave for Edmonton this week, there to spend the earlier part of his holiday, after which he will in all probability travel for a period.

ERNIE PARSONS LAYS DOWN LIFE FOR EMPIRE

News was received in town on Saturday morning last that Corporal E. Parsons had laid down his life in the cause of Empire while fighting in the trenches. The deceased, who was only 23 years of age, enlisted with the 2nd University company of the Princess Patricia's, putting aside his Varsity career of four years studying law. He left Edmonton in May, 1915, and was sent to France in October of last year. He leaves kin at Clara street, Edmonton, and in addition a sister of this brave lad is Miss B. Parsons, of town, to whom the sympathies of her many friends will go out in the loss she has sustained.

The funeral of little Baby Stockwell took place on Monday morning at the Wainwright cemetery.

METHODISTS HOLD BIG CONFERENCE AT LETHBRIDGE

The final draft of stations has now been drawn up by the stationing committee at the annual conference of the Methodist church which was held at Lethbridge, and gives the following ministers for the Wainwright district. Where more than one name appears at a particular place, the first named will be in charge of the station, and the others are attaches:—

Wainwright—R. K. Swenerton, T. W. Bateman, Edgerton—S. Pike, Irma—P. Halstead, Jarrow—W. J. Day, Phillips—J. W. W. Viking—W. G. Shaw, Holden—T. J. S. Tofield—T. A. Bowen, Roundhill—T. N. H. In addition to the above, the following are also allotted to this district: J. W. Smiley, W. Sykes, and W. E. Ferguson.

GERMANY HAS EXCEEDINGLY SHORT MEMORY

Germany's official memory is exceedingly short; already in the fervor of her protests against the hardships imposed on non-combatants by English food blockade, she forgets that when Paris was besieged in 1870-1871 the weekly death rate in that beleaguered city was nearly 5,000 (civilians only), as against a normal rate of 800 weekly. It is nearly impossible to find alive in France now, a person born in Paris during the siege, because the hapless infants that entered the world at that time were so weak and so poorly provided for that most of them died. When Germany agreed, late in 1870, to an armistice as a preliminary to peace negotiations, she flatly refused to permit small amounts of food to enter Paris daily for current consumption of civilians. And in the whole 132 days of the siege, not one attack was made on the French lines—starvation was their best weapon.

Keep your eye open for the Board of Trade Luncheon, and show your appreciation of the work being accomplished by attending this function. Further announcement later.

SUMMER SHOW AT EDMONTON TO BE BEST YET

Prize List Shows Generous Awards to be Distributed

Progress is the watchword of the Edmonton Exhibition Association, and, the prize list for the Exhibition of 1916, which takes place on July 10th-15th, is decidedly up to date.

Among the features worthy of special mention is the addition of \$1,039 to the prizes for cattle, as well as a substantial increase in the amount of prizes offered for sheep. The poultry classes are increased and special attention has been given to this department with a view to encouraging the utility breeds.

Farm products have also secured their quota of consideration. Since the dates of the exhibition came while this year's grain is still growing exhibitors are allowed to exhibit last year's grain, and this will afford an opportunity to every farmer to complete for the general prizes offered. Exhibits in dairy and household products departments have also been revised and brought strictly up to date.

The list of attractions shows many splendid features, including the aviator, Katherine Stinson, who has a phenomenal record for sensational performances in rather prominent American cities, and from the standpoint of practical interest, and entertainment the exhibition of 1915 promises a program which has never been excelled.

REV ASSITER SPEAKS ON KITCHENER

In St Thomas' church on Sunday evening last the Rev. H. Assiter made reference to the loss which the Empire has sustained in the death of Earl Kitchener.

He said in part: "A few days ago a thrill of horrified sorrow went through the Empire when the news came of the tragic death of Lord Kitchener in the North Sea. He was in our judgment, one whom at this time we could least spare, but God, who has infinite wisdom knows what is best for us all."

His qualities as a man and a leader of men, as a soldier or an officer are so well known to us all that I need not speak of them. He is gone; we mourn his loss, and pray that a worthy successor in his great work may soon be raised up.

There is one other who has laid down his life in the same cause, one of the rank and file of Kitchener's army. We bade him farewell a few months ago from this town. I refer to Gordon Newport, he has fought a good fight and died a worthy death in that he was doing his duty. We extend to the friends of these two soldiers Kitchener and Newport our sincere sympathy; and we trust that the time will soon come when a blessed peace shall succeed this horrible war."

It will be of interest to all owners of steam outfits, and team engineers, to note that Mr John Douglas, Provincial Inspector of Boilers, will move his headquarters from Red Deer to Camrose, taking up residence at the latter place July 1st.

Name New Station Petrol

Junction of K. V. and C. P. R. Will Bear Historic Designation

In honor of the gallant French general who has been in command of the operations at Verdun during the terrific onslaughts delivered by the German, the junction point of the Kettle Valley Railway with the main line the C. P. R., near the station of Hope, on the north side of the Fraser River, has been named Petrol. The appellation appears in the new summer time schedules, which are now in the printer's hands, and will be issued shortly.

The new time tables will become effective on June 4th as previously announced. The junction point of the Kettle Valley branch of the latter road, has been designated Brodie, as a compliment to H. W. Brodie, general passenger agent for the C. P. R.

Useful in Camp.—Explorers, surveyors, prospectors and hunters will find Mr. Thomas' Electric Oil very useful in camp. When the tent and legs are wet and cold it is well to rub them with the Oil before going to bed. It is the prevention of pains in the muscles, and should a cut, or contusion, or sprain be made, the Oil will do much better as a dressing or lotion.

The old lady from the country and her small son were driving to town when a huge automobile bore down upon them. The old lady was so frightened and began to prance, whereupon the old lady leaped down and waved wildly to the chauffeur screaming at the top of her voice.

The chauffeur stopped the car and offered to help get the horse past.

"That's all right," said the boy, who remained composedly in the carriage. "I can manage the horse. You just lead Mother past."

No Girl Need Have a Blotched Face

Whether it be in capturing the heart of man, or making her way through the world by the toll of her hands, a charming and pretty face gives any girl a big advantage. Poor complexion and rough, sallow skin are caused by blood disorders. The cure is simple. Just use Dr. Williams' Pink Pills—a reliable family remedy that has for years been the foremost blood remedy in America. That soft glow will return to the cheeks, the eyes will brighten, appetite will improve, strength and endurance will come because sound health has been established. Get a box of Dr. Williams' Pink Pills today. Sold everywhere.

The Modern Child—Sunday School Teacher—"Now children, what is the last thing you do before you go to bed at night?" Bright Girl—"Put the latchkey under the doorknob for mother."

Warts will render the prettiest hands unsightly. Clear the excrescences by using Holloway's Corn Cure, which acts thoroughly and safely.

"There is this fact," said Jones, after a long argument on the question of man's superiority over woman—"at least there is one good, sweet and perfect thing given to man which a woman cannot have." "Never?" cried his wife. "Never! I deny it! What do you mean?" "A wife!"

Keep Minard's Liniment in the house.

France is a long way from a state of famine, if one may reckon with the gold that lies in the Bank of France when last reported upon in March. It then amounted to the sum of \$782,030,000.

FEET FOOT SHOES
for Playful Children
NOTHING BETTER FOR SUMMER WEAR
Worn by Every Member of the Family

COOK'S COTTON ROLLS
A safe, reliable compound medicine. Sold in three degrees of strength. No. 1, 15¢; No. 2, 25¢; No. 3, 35¢ per box. Sold by all druggists. Paid in plain package on receipt of price. Pamphlet. Address: THE COOK MEDICINE CO., TORONTO, Ont. (Solely Mailed)

MURINE Granulated Eyelids. Lysed by exposure to Cold Wind and Dust. Your eyes quickly relieved by Murine Drops. Sold by all druggists. For full particulars, write to Murine Eye Remedy Co., Chicago.

The Sphere of Woman

What of the Women Workers After the War is Over?

"What can be done must be done now. I fear and hope I am wrong in fearing great changes will follow this tremendous war, say Sir Rider Haggard."

"Its effect on the industrial nations will be deep and revolutionary. In England the most startling thing with which we find ourselves face to face is female employment outside the home. Hundreds of thousands of women now because of the war have found their métier. From a multitude of homes they have emerged and now are doing their full share in the world work, and incidentally doing it exceedingly well, when their lack of previous experience is taken into consideration."

"Will they be content to lapse again into an aimless security with nothing in front of them save, perhaps, loveless marriage, or that combat with social conditions which is likely to end in their own ruin?"

"I think not."

"That means that they will do a share of the world's work, displacing men who have been doing it."

"And that means that a certain number of men—a large number, who will be displaced—will have to turn elsewhere than to their old employments for their livelihood."

"Again, it means that women will be sure to get the vote and will take up the burden of accomplishing their share toward the guidance of the nation. I think within fifty years they will be helping in the guidance of all nations."

"I pray heaven that they may use their new found influence aright and think that it will be the case because while women work by instinct rather than by reason in eight times out of ten women's nature takes to results more accurate than those to which our reason guides us."

"Another thing which must be remembered is the fact that in England the high wages which the war has brought to pass cannot be maintained in general after the war ends. The trades unions will not like to see them sink."

"This inevitably will mean trouble, and it may mean great trouble. The only real relief from this trouble will be found in a return to the more primitive conditions that are in touch with nature. We cannot get safely away from Mother Nature; for long, at any rate."

LITTLE WORRIES IN THE HOME

It is These That Bring Wrinkles And Make Women Old Prematurely

Almost every woman has the head of a home meets daily many little worries in her household affairs. They are too small to notice at the hour allowable, but it is these little constant little worries that effect the blood and nerves and make women look prematurely old. These little worries may be noticed in sick or nervous headaches, feeble appetite, pain in the back or aches and pains, and the coming of wrinkles, which every woman dreads. To those thus afflicted Dr. Williams' Pink Pills are a speedy and certain cure; a restoration of color to the cheeks, brightness to the eyes, a hearty appetite and a sense of freedom from weariness.

Among the thousands of Canadian women who have gained new health through Dr. Williams' Pink Pills is Mrs. N. Worrall, Brookville, Ont., who says—"After the birth of my second child I was so weak and run down that I was unable to do anything but eat and sleep. I suffered any blood in my body. I could not walk half a block without being completely exhausted and all treatment of the doctor did not seem to help me. I called in another doctor, but he could do nothing for me. My legs became frightfully swollen, I suffered with severe pains in my back and sides, and I was all day dragging around at my household work, and I was beginning to give up all hope of recovery. I found out that Dr. Williams' Pink Pills were the only thing to do so, but after much urging I decided to try them. To my surprise in a few weeks I found myself able to do my house work without fatigue. I strongly advise every weak woman to give Dr. Williams' Pink Pills a fair trial."

You can get these Pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brookville, Ont.

The Spirit of Confidence

A Canadian officer formerly in a Canadian Government office writes "I had a stroll over the ground at the back of our trench, and an awful sight met my eyes, but a slight, unfortunately, I have looked upon before—the sight of a battlefield after the battle. The Huns were practically blown out of their position; the trenches had been smashed so that one could hardly recognize that they had been trenches; dug-outs were blown in, and there were signs that they held a good number of dead. The more I look at this position the Huns held the more I wonder how ever about shifted, and I am more convinced that we can shift them from any position they hold."

Pills for Nervous Troubles.

The stomach is the centre of the nervous system, and when the stomach is out of order the result is manifest in disturbances of the nerves, and of the entire system. It is a dangerous ailment, may ensue. The first consideration is to restore the stomach to its proper condition. There is no safer remedy for this than Parnell's Vegetable Pills. Thousands of cases attest the value of these pills in curing nervous disorders.

Alberta to Be Big Dairy Producer

Alberta's cheese-making industry is making rapid strides. Thirteen cheese factories, compared with 37,663 lbs. of cheese, compared with 70,581 lbs. made in five factories during 1914. An increasing demand in that 50 per cent. of the past season's output was manufactured in the city dairies of Calgary and Edmonton.

The creamery business of the province also made marked progress during the year. The creamery butter production being 7,600,000 lbs., compared with 5,500,000 lbs. for the previous year.

THE BEAUTY OF SUNLIGHT

is that every garment washed with it bears the impress of purity; a purity begotten of sweet, cleansing oils, and maintained by absolute cleanliness in manufacture; a purity exalted by the co-operation of workers united for the purpose; a purity demonstrated by the "KESON" guarantee, which rests upon every bar of SUNLIGHT SOAP.

A substitute for Sunlight is not a good and never so for the best when the greatest—SUNLIGHT SOAP.

5c. The name Lever on Soap is a guarantee of Purity and Excellence. 5c.

Horses for Military Service

Sixty Thousand Already Bought in Canada By Allied Governments

Advice from the War Office indicates that a very considerable number of horses for military purposes will be required from Canada this summer.

About sixty thousand, it is estimated, to be required by the British Remount Commission, with headquarters in London. Probably another twenty thousand will be purchased in Canada this year. This insures a steady market for horses, and prices for horses suitable for artillery and transport work.

Lieut.-Col. Dr. Warnock, M. P., has been ordered to again report for duty in Montreal to help superintend the work of securing and inspecting remounts.

Ask for Minard's and take no other.

Holland and the War

Sir Edward Russell, one of the best informed of British journalists, had this to say in a recent issue of the Liverpool Daily Post—"Some six years ago when the present war was in Holland the Dutch upper classes talked of the war between England and Germany as being inevitable. If England was defeated, one heard on all sides, then Holland's only resource against annexation by Germany would be the opening of the dikes. That feeling has never changed during the present war, though Germany has lost money galore on its small neighbors. It can be said with emphasis that never before has our province of Flanders been in such close relation to the Dutch Government. Before the close of the summer some interesting developments are quite possible in the land of sturdy men, hard thinkers and good lovers.—Edmonton Journal."

World-Power or Downfall

Holland Government has ordered Gorged with the loads of Lillie, the machines of Belgium and Northern France, and the French cottages—gorged with plunder, drenched with blood, blood—blood of Frenchmen, of Belgians, of the blood of British, of Russians by the million, of Poles, Serbs, Italians, Armenians, and of the blood of the blood of women and children an unnumbered throng—how can the dripping Teuton, lately so fierce, find peace?

He can have it at a price, for, of course, all Europe waits it pitifully, but he cannot now get it without a casar, and terms are not growing any easier before Verdun. If the war had not been so long, it would have been a war of world-power or downfall, and such a war it is very hard to call off till one or the other side is beaten.—From Life.

Farm Lands Will Increase in Value

The pioneer stage of farming is about over. Another generation will see the last of the free land snapped up. The younger men among us will find land values increased during their day in proportion to the death of land and the increase of demand. Idle acres will be turned into farms. What speculation will gradually sober down. Time will bring about the adjustment of the type of farming to the soil and market conditions of the locality. We shall hear less of big money crops and more of solid farming values and real contentment.

Magistrate (examining a witness): You admit you overheard the quarrel between the defendant and his wife? Witness—Yes, sir, I do. Magistrate—Tell the Court, if you can, what he seemed to be doing? Witness—He seemed to be doing the listening!

He-I Wonder why three-fourths of the typists in business offices are women?

She-I think it is because men like to feel that there is at least one class of women whom they can dictate to!

It's a dreadful thing. Won't you stay and dine with us?

He—Really, thanks most awfully, but it's not quite so bad as all that.

Report on Waterworks

Valuable Edition Recently Issued by the Commission of Conservation

A new edition of "Waterworks and Sewerage Systems of Canada," by Leo D. Denis, has just been issued by the Commission of Conservation. In the present report the various physical and financial data respecting water-works have been brought up to date and a new section on sewerage systems, which gives an average daily consumption per capita of 111 gallons, ranging from 50 gallons in Manitoba to 143 in New Brunswick.

In the year of Confederation there were only 7 waterworks plants in Canada; today there are 928. These have been built at a total cost of \$133,725,000 and entail an annual maintenance charge of \$4,568,638. The total daily consumption is \$5,577,000 imperial gallons, which gives an average daily consumption per capita of 111 gallons, ranging from 50 gallons in Manitoba to 143 in New Brunswick.

There are 206 plants supplied from springs and wells and 322 from lakes or rivers. In 72 per cent. of the plants are filled and in 21 plants it is treated with hypochlorite. The municipality which gives an average daily consumption per capita of 111 gallons, ranging from 50 gallons in Manitoba to 143 in New Brunswick.

There are 270 sewerage systems in Canada, having an aggregate mileage of 4,282 miles, which have been built at a total cost of \$74,004,418. In only 75 municipalities is the sewage treated. Proportionally to population, the West, with 28 treatment plants, makes a much better showing than the East, with 100 treatment plants. The treatment plants in \$3,218,303.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Hall's Catarrh Cure has been taken by catarrh sufferers for the past thirty-five years, and has become known as the most reliable remedy for Catarrh. Hall's Catarrh Cure acts through the blood on the mucous surfaces, expelling the poison from the blood and healing the diseased portions.

After you have taken Hall's Catarrh Cure for a short time you will see a great improvement in your general health. Start taking Hall's Catarrh Cure at once and get rid of Catarrh. Sold by all Druggists, 75c.

A "Tommy," lying in hospital, beside him a watch of curious and foreign eyes. The attending doctor was interested.

"Where did your watch come from?" he asked.

"A German gave it me," he answered.

"Little piqued, the doctor inquired how the foe had come to convey his token of esteem and affection."

"Helping," was the laconic reply—London Letter.

"Now, my little girl, tell me," said a Sunday school superintendent, "which you would rather be—beautiful or poor?" "The little girl answered thoughtfully, "that I'd rather be beautiful—and repent."

Angry Mother—"N.W., Willie, don't let me have to speak to you again!" Willie, helplessly—"How can I prevent you, mamma?"

Hair combs with removable teeth that can be replaced when broken have been invented.

Digging Post Holes

A farmer from Wyoming asks for information as to the most rapid and economical method of digging post holes. An expert in farm mechanics answers:

Driving posts is not to be recommended unless only a temporary fence is desired or sharp metal posts are used. If the posts are of wood a large proportion will crack under the blows of the sledge.

The sledge as an implement is usually not efficient, for only a shallow hole can be dug with it, and a post to be set properly must be set at least two and a half feet into the earth. With a regular post-hole digger the hole may be easily and quickly made as deep as desired.

There are three general types of diggers in common use: the plain flat auger, the cylinder-cased auger, and the spiral auger. The first is the simplest and cheapest, but it is opened and closed by moving the double handle. The second type can be used efficiently and can be secured the greatest variety of conditions, and consequently is most widely used.

The cost of digging the holes will depend upon the character and consistency of the soil, the depth to which the holes are to be dug, and the ability of the worker.

Book Learning is Not All

It is a curious commentary on the quality of human understanding that so many writers should have laid so much emphasis upon the fact that Shakespeare's only "education" was secured within the walls of a village grammar school. What a world of nonsense there is in the superstition that a knowledge of books means a knowledge of nature and mankind! How much more nonsense there is in the superstition that knowledge of nature and mankind cannot be secured except through the perusal of many books.—Outlook, New York.

A movement is on foot in Great Britain to do away with the golf links throughout the country till the war terminates. This is necessary, say the advocates, in order to economize horse and man. In some instances golf links are being planted with vegetables.

The Parson—I congratulate you on your excellent crops of wheat this year, Mr. Grouse.

The Cocky—Ah, do you? Ah? Not about the terrible extra expense in taking it off my buyin' bags?

Old Gent—"Where were you born, boy?" Boy—"Ya born?" Old Gent—"What part?" Boy—"All of me, sir, 'cept my 'air and teeth. They was born in, Birmingham and Leeds respectively."

A sanitary ice box prevents many illnesses—keep yours sanitary with

Old Dutch

The Boy on the Farm

The Farm Offers the Best Opportunities For Success

The farming business is now coming to a point where it is generally recognized as the most prosperous business, offering the best future and the brightest prospects. That being so, there will be no trouble about keeping the boy on the farm, for he will be keen to see that it is the best place to make money, gain the respect of his fellow-citizens, and obtain that standing among which is the ambition of every right-minded boy. It is to gain these things that he has heretofore gone to the city; it is to gain these things that he will hereafter stay on the farm and that will send the youths of the city to join him. All he wants to know is as to what pays best in the sum of human happiness and comfort and success. It is now being demonstrated that in all these things the farm offers the best opportunities.

War Veterans and Politics

Canada is expecting confidently that, with the return of peace veterans, will control the politics of the country. The politics of the United States for a generation following the civil war, and is rather rejecting the prospect. It is to gain these things that he has heretofore gone to the city; it is to gain these things that he will hereafter stay on the farm and that will send the youths of the city to join him. All he wants to know is as to what pays best in the sum of human happiness and comfort and success. It is now being demonstrated that in all these things the farm offers the best opportunities.

A Quartermaster in Pennsylvania

caught a carp in a stream near his home and found a diamond ring in it while he was cleaning the fish for his supper. He took the ring to a jeweller, and found that it was worth \$100. It is believed that the ring dropped from the finger of a fisherman or butcher and was sucked out of the mud by the fish.

A Diplomat

Mrs. Eke—"You always have such wonderful success in getting people to come to your parties."

Mrs. Wye—"Oh, I always tell the men that it's not to be a dress-up affair and the women that it is."

Touching Wood

Whenever my wife comes up behind me and pats my head, I know she's going to ask for money.

"She touches wood for luck, eh?"

Bayley—"Is your house insured against fire?"

Glenn—"I don't know. I've just been reading over the insurance policy."

Ninety per cent. of Italian boot and shoe factories are equipped with American machinery.

How the Blood Is Purified

By the Searching and Painsstaking Work of Healthy Kidneys.

In its circulation through the body the blood not only carries nutrition to the cells and tissues, but also collects the waste material resulting from the breaking down of cells and tissues, the ashes left by the fire of life.

In due course the blood passes through the kidneys to be purified of these poisonous impurities, and these filtering organs extract each day about 50 ounces of liquids and 2 ounces of solids, 500 grains of urea and 10 grains of uric acid, the material which is found in rheumatic joints.

Sudden changes of temperature throw a great strain on the kidneys, but it is overeating and drinking that are the usual cause of trouble.

In a vain effort to remove the excess of waste matter the kidneys break down, uric acid and other poisons are left in the blood and the whole system is poisoned by impure blood.

Pains in the back and limbs, severe headaches, lumbago and rheumatism are the natural result. Hardening of the arteries, excessive blood pressure, weakening of the heart's action, Bright's disease may be anticipated unless prompt action is taken.

We like to think of Dr. Chase's Kidney-Liver Pills as preventive treatment, for by their timely use you can readily prevent all these dreaded disorders. Unlike other medicines for kidney troubles, they awaken the action of liver and bowels as well as the kidneys, and thereby effect a prompt cleansing of the whole filtering and excretory systems.

There is no way by which the action of the kidneys can be so quickly aroused and the blood cleansed of impurities as by the use of Dr. Chase's Kidney-Liver Pills. It is therefore the greatest of blood purifiers and much sought for at this time of year, when everybody feels the need of a medicine to cleanse from the system the accumulation of poisonous matter.

One pill a dose, 25 cents a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

Do not be talked into accepting a substitute. Imitations disappoint.

CAN BE NO HALF MEASURES IN DEALING WITH THE GERMANS

**Premier Hughes of Australia says That Everything is at Stake
In This War, and That There Can be no Peace Until the
Treachorous Nation of Germany is Beaten**

A Fatal Mistake

German Aviator Lands in British Lines and Machine of the Latest Type Was Captured

A unique incident occurred when for the first time during the war so far as is known, an aeroplane mistook a hostile aeroplane for its own.

During the evening the British aviators at one of the British aerodromes saw a German machine circling as if it were about to land, and interfering with its movements, thinking that it had lost its bearings there they ordered it to come lower until it finally alighted in the enemy lines.

The German aviator and his pilot saw their mistake too late when they were already in the hands of the enemy, and they realized that they were prisoners.

In a speech delivered at Eilinburgh, Premier Hughes of Australia said:

After nearly two years of war the world has not yet seen a day when it existed in our country some people to whom the war has taught very little and who are asking the question, "Why is the war not over today?" are marching steadily and bravely to the point when we shall wear the sceptre from the grasp of the military despotism which has been the cause of the civilization of Europe and has vowed our destruction."

It is a mistake to think that thought that in a little while all would be well, that our arms would be speedily crowned with victory, but in face of the facts, it is a mistake to think that we cannot do so. I believe, however, as firmly as it is possible for a man to believe, that the day will come when Germany should win this war. But

The great aerial activity of these days has brought forth many daring exploits, and one of the most narrow escapes. One British machine was struck by anti-aircraft gun shell which passed through the body of the pilot, and he was hurled from the shell exploding without having the engine. All the aviator felt was a lump in his throat, and he lay motionless, and he was left to be picked up and working and he descended to a road inside the German lines. The shock of landing killed the liver and he was taken to a hospital and he died before returning on the German aviator and his pilot, who had left the machine to be taken care of by the British aviators, then returned safely to their own lines.

Recitation Hints

Needed Entertainment For the Men

at the Front

This curious war where men live in trenches and die really without the pomp of "the tented field," the need of meeting places for the men of duty has been keenly felt. Recreation has been a war in the recreation hut. It fills a gap that has been keenly felt in earlier campaigns. Recreation is the most important role in military schemes for the future.

Between the fighting, recreation is essential for renewing the fitness

Some of the huts provided by the Chetniks were in the mountains, close upon one thousand men. They are cozily warmed by a system of stoves and are furnished with beds, blankets and comfortable with pictures and easy chairs. A buffet provides refreshments, and there are also a post office, a post office, baggage and billiard tables, indoor games in abundance and a large library.

A concert stage, piano, gramophone and orchestra are also available.

[illegible][illegible]

With the French Army

Thousands of French-Canadians in the Army of France

According to "Canada" (of London) correspondent at the Lyons Exhibition now open, the feeling of the French towards Canadians is friendly. This has not only been produced by the magnificent courage and bravery of the Canadian Expeditionary Force, but also by the fact that

perms, and scattered where the wounded lie. The French are not so concerned, or children would perhaps pick the map as providential "finds." A French soldier is seen in the distance, the line at such infancy in time of war.

The Hun takes a holy posture; however, in these truces, the Germans are all being accurately described by a committee at the British War Office, and will be in the hands of the British War Office. The Powers will sit upon the great question that has been forced upon them by the German Government of "rightfulness," and decide what is fair and what is not fair in a condition of war.

First Married Man—What are you

The Unbeatable Factor

Sold Great Britain lay all over her land, "Beaten in this war," she? You will find, judge, that she is not only unbeatable in battle, but called upon to be all things to men and Sennets to Germany.

If a man makes me keep my distance, the comfort is that he keeps his at the same time.

W. J. HUNTINGFORD - MANAGING EDITOR

WAINWRIGHT, ALTA., WEDNESDAY, JUNE 14th, 1916

THE BIG PATRIOTIC CELEBRATION FOR WAINWRIGHT

It is at last decided. "To be or not to be" that WAS the question, but the question has at last been definitely decided that Wainwright is to have what is planned to be the biggest and finest celebration ever held here and that it is to be held on the 29th of this month. The fact also that twenty-five per cent of the actual proceeds swell the Patriotic Fund, should go a long way towards helping the splendid committee which have the whole matter in hand to bring the affair to a very successful conclusion, so that it will prove no ideal boast—"this year is to be the biggest and best ever."

The joint patriotic celebration committee which is representative of the Board of Trade, the Town Council, and the Wainwright Agricultural Society, consists of the following members: Messrs B. Simmerman, F. Gordon, O. J. Elder, H. P. May, F. E. Fraser, S. Morrick, G. A. Smith, W. A. Harris, G. H. Beaudry, H. A. Cook, J. L. Gorow, J. B. Milne, W. E. Washburn, with Mr P. C. Haymes acting as Committee Secretary, and with such a body to "man the ship" the only requisite necessary for ultimate success is for the weather man to be on his best behavior on June 29th, 1916.

The program which is being arranged for the day will include horse-racing, foot-racing, baseball, football, and other attractions and seeing that it is intended that special trains be arranged for from Biggar on the east and Tofield on the west, there should be somewhere in the neighbourhood of 4,000 to 5,000 people gathered here on the auspicious occasion.

Despite the financial stringency of these strenuous times, the subscriptions lists which have been in circulation during the past few days have met with a hearty and generous response, which indeed augurs well for the project so that in addition to each and every townsman and visitor having a good time, all can rest assured that by their support they are aiding still further the cause of Empire, by adding their quota to swell the funds of that most necessary organization during these times of war distress and want—the Patriotic Fund. Here's wishing success to the Patriotic Celebration for Wainwright, June 29th, 1916.

GOOD FOR CANADA AFTER THE WAR

AS IS POINTED OUT in the following editorial from a Calgary exchange, the spirit of optimism, which is always running high in our beloved though undeveloped West, should do much toward the ultimate solution of the problem of where will the emigrants go after the war. It is a safe prediction that we will receive a large flow of immigration from Europe, but it is hoped that the quality will be an improvement on the past, and that greater restrictions will be placed upon those wishing to come here who are so assuredly undesirable:

"After the war Canada should be one of the favored countries of the earth. The Old World will be a quarter of a century recovering from the first shock of the war, and in the interim its productive powers cannot be utilized to the full. On the contrary, Canada's productive powers will continue to increase indefinitely, and with great areas of free and undeveloped land and with our democratic form of government, the Dominion will be the Mecca for hundreds of thousands of those who want homes in new lands and under new conditions. Remote from the scenes of war, although still a part of them, Canada will be attractive to Old World settlers. Its taxes will be light compared with those that will be imposed in Europe, and its facilities for producing food stuffs and other necessities of life at low cost will make it desirable in the eyes of homeseekers. Canada is destined to become the home of the bulk of the English-speaking population of the British Empire some day, and this day is being hastened by the war and the conditions that will follow it.

FUTURE OF THE LIVE STOCK INDUSTRY

AT ALL TIMES it behooves farmers to note that things are well with their live stock, but there never was a period when Canadians were more earnestly summoned to do their utmost in this respect, and never was there a period when so much depended upon their efforts. In a comparatively short time, reckoned by years, probably before the cattle begotten this year come to early maturity, there is going to be a universal demand for live stock of every description, but especially for the bovine. The nations at present at war will be very tired of eating canned and salted stuff and will demand fresh beef, and as for dairy cattle, there is even now a scarcity of milk owing to the great output of cheese required, and the needs of the day must of necessity be very far short of what they will be when the declarations of peace are signed. On the manner of cattle we breed now will depend our successful profit not alone then but always.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

The sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-Agency), on certain conditions.

Dweller—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$5.00 per acre.

Dweller—Six months residence in each of three years after granting homestead patent; also 30 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$20.00 per acre. Dweller—Must reside six months in each of three years, cultivate 20 acres and erect a house worth \$100.

The area of cultivation is subject to reduction in case of rough scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

W. W. COVEY, C.M.G., Deputy of the Minister of the Interior.

What does a bevel gear cost? The Ford owner saves \$12 that the other fellow has to pay for one

\$16.00—Average cost of the bevel gear of cars priced around \$1000 and less.
\$ 4.00—Cost of Ford bevel gear.
\$12.00—This stays in the Ford Owner's pocket book.

Other Ford spare parts are just as low priced in proportion—the 26 most called for parts altogether cost only \$8.04.

And less than a dollar a year as a total expense for spare parts is not at all an uncommon experience of Ford owners.

3. Mr. Gould: That the motion re width of grade be amended to read that the road grade be constructed not less than 14 ft. at top when finished. C. U.

4. Mr. Stanyer: That correspondence re road between Sections 26 and 36-41-5 be tabled. C. U.

5. Mr. Taylor: That D. M. Hyatt's arrears of taxes be cancelled to date of filing, said date is Nov. 23rd, 1914. C. U.

6. Mr. Smith: That J. Loftus' taxes be cancelled to date of filing, said date is July 30th, 1913. C. U.

7. Mr. Davy: That A. L. Angus' arrears of taxes be cancelled to date of filing, said date is July 29th, 1913. C. U.

8. Mr. Gould: That C. H. Gould's arrears of taxes be cancelled to date of filing, said date is Jan. 7th, 1914. C. U.

9. Mr. Stanyer: That the council accept Mr. C. Long's offer of \$10.00 for road allowance through S. 12, 5, 11-6. C. U.

10. Mr. Smith: That the road work through N. E. 1/4 of 11-12-6 be left till the crop is taken off. C. U.

11. Mr. Gould: That the subject re Chas. Michael be left over till next meeting and the Sect. in the meantime is to interview the lawyer regarding the case. C. U.

12. Mr. Davy: That McCafferty Union of U. F. A. receive permission from R. M. Vale to use the road with their telephone wires for a period of five years and they are also instructed not to put their poles more than five feet from fence line and they are not to obstruct the right of way. C. U.

13. Mr. Hines: The question re refund from Culverts be tabled till next meeting and the council written to re conditions of shipment and Mr. May be asked for advice. C. U.

14. Mr. Davy: That N. Ward's bill of \$24.00 for two ac. of land sold to R. M. Vale for road purposes be paid. C. U.

15. Mr. Taylor: Mr. H. E. Middleton's bill of \$6.00 be paid, said bill is for premium on bond. C. U.

16. Mr. Smith: That the Western Man-News bill of \$29.75 for stationery be paid. C. U.

17. Mr. Stanyer: That Wainwright Star bill of \$25.00 for printing and stationery be paid. C. U.

18. Mr. Davy: That Sect. Treas. bill of \$320.55 for salary, postage, express and stationery be paid. C. U.

19. Mr. Gould: That requisition from Bradford, S. D., for \$450.00 be accepted. C. U.

20. Mr. Smith: That Mr. Somers report as a committee on road north of Sect. 2-41-5 be accepted. C. U.

21. Mr. Taylor: That Sect. Treas. report be accepted. C. U.

22. Mr. Smith: That the Sect. write Judge and have him set a date for Court of Confirmation about Aug. 1st, 1916. C. U.

23. Mr. Davy: That the 3rd reading of By-law be held over till next meeting and that Reeve and Sect. meet accordingly. C. U.

24. Mr. Davy: That J. Taylor has power to authorize Road Supervisor to work on road to be made across Sect. 21-43-4. C. U.

25. Mr. Smith: That Mrs. Somers request of \$29.00 per month from Apr. 15th to June 15th, 1916, for arrears of taxes be accepted. C. U.

26. Mr. Smith: That R. M. Vale purchase timber for bridge on south end of Dundas Lake, the following material to be used:

9 pieces, 3 in. x 10 in. x 12 ft.
11 pieces, 3 in. x 10 in. x 10 ft.
8 pieces, 3 in. x 10 in. x 16 ft.
2 pieces, 2 in. x 10 in. x 16 ft.
2 pieces, 3 in. x 10 in. x 12 ft.
20 lbs. 6 in. spikes. C. U.

27. Mr. Davy: That the Council of R. M. Vale 392 authorize the Reeve and Sect. to borrow at the Merchant's Bank, Edmonton, as much as possible up to \$2,000. Carried. C. Stanyer agent.

28. Mr. Gould: That Messrs. Davy and Taylor be a committee to investigate the possibilities of opening up a road through Sect. 28-42-4. C. U.

29. Mr. Gould: That question re road on Sect. 15-42-4 be tabled till next meeting. C. U.

30. Mr. Davy: That the Sect. notify H. Ray to open up a road four rods wide south of his land. Lost For-Hines, Davy, Taylor.

31. Mr. Gould: That the taxes have to be in for the Court of Confirmation when there are chattels on the land. Carried.

32. Mr. Smith: That the Council order a 12 in. by 24 in. culvert from 5th Metal Works to be laid down at Greenhills. Lost. For-Davy and Smith.

33. Mr. Gould: The next council meeting be held at Daisy S.H. on June 24th for Court of Revision. The following meeting to be held at Buffalo View S.H. C. U.

34. Mr. Hines: That the council adjourn. C. U.

Why Do Boys Leave the Farm

Social Conditions are to a Great Extent Neglected

The Commission of Conservation during the year 1915, conducted an agricultural survey on 400 farms throughout the Dominion. Various phases of farm life were investigated, and some interesting conditions presented.

Social conditions, and other important factors, are to a great extent neglected on the farms, and go to the city. Seven per cent. have sons married who are farming. Nineteen per cent. stated that they were following some form of bookkeeping, but only one man was following a complete method, sixty-seven per cent. take agricultural papers, seventeen per cent. take story magazines, and seventy-seven per cent. take a daily paper.

In 43 per cent. of the families visited there were young people over 14 years of age, while 10 per cent. had a lone and buggy or an automobile for the young people. Sixty-one per cent. of the farmers attended some kind of community event or picnic during the past year, chiefly church socials and picnics.

Here it may be stated that the rural churches have a great opportunity to develop the social life of their activities, to reach more of the young people in the country and interest them in clean amusements, sports and recreation. The local fair is a most important instrument of the young people in the country.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When given to a child, it will not injure the most delicate child, as there is nothing of an irritating nature in the powder. They will speedily rid a child of worms and restore the health of the little sufferer. Worm infestation is greatly impaired by the attacks of these internal pests.

How to Save Potato Crop

Neglect of Treatment Causes a Heavy Annual Loss

From 1905 to 1915 the average annual yield of potatoes in Canada was 18,405,000 bushels, constituting one of our important food crops. The annual yield, however, is greatly lessened by the ravages of diseases and insects.

The season of 1915 was admittedly one of the best for potato crops, but the blight, and the botanical division of the central experimental farm observed that, in one small field, the loss from the blight alone was estimated at about 2,000,000 bushels, not including loss in storage.

Potato diseases may be controlled in different ways, some by spraying, some by seed treatment, and some by selection. For early and late blight and for flea beetles, Bordeaux mixture is used. For late blight, a solution of potassium permanganate is used. For the Colorado potato beetle is also kept in check. Numerous experiments have been made which demonstrate clearly the practical value of spraying with Bordeaux mixture.

When sprayed with Bordeaux mixture, the yield on the sprayed area averaged 271 bushels per acre, while the unsprayed area averaged 129 bushels per acre for the same period. The lowest gain from spraying was 55 per cent., while the average was 92 per cent. This evidence should be sufficient to convince every farmer that it pays to spray. It does not cost much and is not so troublesome as many imagine. If you have not full directions at hand, write now to the nearest experimental farm or the Central Farm at Ottawa and you will receive complete instructions regarding making and applying Bordeaux mixture.—F. C. N.

Norway Favors Great Britain

"In our neutral countries we look upon the war as being fought in the interests of the nations against German militarism," says Mr. Johan Castberg, President of the Norwegian Delegation and Minister of Justice and Social Reform.

"We have followed with close interest the statements of Mr. Asquith and others on behalf of the British Government as to why England entered the war, and it has been a great satisfaction to us in Norway to know that those lines of policy will not be departed from as far as England is concerned."

"As foreigners, we cannot, of course, meddle in your politics, but there is a strong feeling in neutral countries, and especially in Norway, that the continuity of the British government should remain unbroken."

Referring to the British blockade, he said: "It is harassing to the trade of neutral countries, and there must be some compensation for this. But that is a very different thing to killing of neutrals and non-combatants by submarines. And we trust that England will try to cause as little inconvenience as possible to neutrals."

Consoling—"What did you say your name was?" he remarked, between dances.

"Well, I didn't say," smartly returned the girl, "but I've just returned twenty-one."

"Is that so?" he returned, consoling. "What detained you?"

A young and ambitious preacher who was staying at a friend's house retired to his room at an hour or so each day to practice pulpit oratory. Although he did not know it, at times his impassioned tones could be heard throughout the house. A Bishop happened to call one day when the budding orator was holding forth. "Glorious man!" exclaimed the Bishop. "Pray, what might that be?" "Blessed man," his friend replied. "That's only a young man practicing what he preaches!"

Tourist—What very changeable weather you get down here!

Old Fisherman—Changeable do ye call it, sir? It's not so changeable we'd have changed 't long ago!

Butter and Health

Milk is Not Considered Safe Unless It is Pasteurized

The relation of butter to health is a question to which certain very eminent hygienists have been turning their attention recently (writes David J. Hickey in an article on "How Butter is Made," the Housewives' League, Magazine.)

Such a person as Prof. Posenau, of the department of hygiene at Harvard, made some very remarkable studies on the subject. The Bureau of Animal Industry of the United States, through its scientists, has done a great deal to throw a much needed light on the subject also.

It is a well established fact that disease can be disseminated through the agency of raw milk, and it seems only logical to question whether the same disease germs cannot be carried in other dairy products made also from raw milk and cream, such as butter and cheese.

It is estimated by the government that about 10 per cent. of dairy cows in the United States are suffering with some form of tuberculosis. There are about two hundred million of dairy cows in the United States at the present time, so that would mean two million tuberculous dairy cows.

In New York State alone, the Bureau of Animal Industry estimates that fully one-third of the cows have tuberculosis in some form.

Milk from such cows cannot really be considered safe unless it has been pasteurized, and the great bulk of it used for butter making is not pasteurized.

Rosenau gives the following results from experiments made at Boston last year: "Twenty-one samples of butter of unknown origin purchased on the open market gave positive results of tubercle bacilli gave positive results in nine and one-half per cent."

One of the most important subjects among government officials that tubercle bacilli continue to lurk in butter, and that butter has been kept for five and six months in cold storage! Pasteurization would have killed the bacilli and eliminated much danger and risk to the users of the butter.

One of the worst diseases among cattle, caused by a germ known as the bacillus of infectious abortion, which causes the abortion of thousands of calves annually can be carried by the agency of milk and butter. It has been found in humans as a result of eating milk and butter.

It is the germ of the disease known as the bacillus of infectious abortion, which causes the abortion of thousands of calves annually can be carried by the agency of milk and butter. It has been found in humans as a result of eating milk and butter.

The Great Bagdad Stake

Capture by Allies Would Change the Moslem Order

The chief significance of the Anglo-Russian campaign in Mesopotamia lies in the one fact that Bagdad, the strategic aim of the conflict, has been the seat of the Caliphate in the past and is one of the recognized centres of the power of Islam today.

In dealing with Turkey and the Kurds one must take account of a simple but tremendous fact—that, far from being a solitary individual or power, the power in this one backed more or less unanimously and vigorously by sentiment of the Mohammedan world outside the Turkish Empire.

The Kaiser, a skillful diplomat as well as a trained soldier, has had the shrewdness to make this fact the very cornerstone of his foreign policy relative to Turkey since the beginning of his reign.

The climax was reserved for our day. The great war was declared on Aug. 1, 1914, and Turkey's rights were in peril and all her interests required a nation of absolute neutrality. The world was in a state of confusion and the world was in a state of confusion.

New British Machine Gun

It Accounted for 320 Germans in Half an Hour

The Germans were for many months superior in machine guns, but the British now have a gun which can beat this and is beating it every day. Invented by an American officer, Col. Lewis, and made in Belgium, it was used to the moment when the German scouts entered the city of its manufacture, the invention narrowly escaped capture by the Germans.

Its killing power may be gauged from the fact that in one trench recently one of these guns, manned by a crew of two men, accounted for 320 Germans in half an hour.

Shoddy Finery Unpopular

According to a London newspaper, women, who never made money before in England, are now doing so. A large proportion are spending their gains on health and fat-producing foods. An observer of the changed habits of the women of the Empire, who are looking plump and well fed—resembling the French and American girls—said that the change was a thin or anemic young woman now. Shoddy finery is also disappearing. It is a new fashion, a new style, a new type of dress, such an extent that dress stores give them extra display in their windows.

CHURCH NOTICES

The services at the Grace Methodist Church next Sunday will be conducted by the pastor who will take as his subjects "The Commonplace" and "Sure I must Fight if I would Reign." The Sunday School and Bible Class will meet at 2:30 P.M.

At the Presbyterian church, the pastor will conduct both services. Morning subject, "Our National Home Life." Evening subject, "What is Man's Greatest Possession?" Special music by the choir.

In St. Thomas' Anglican church on Sunday next there will be divine service at 7:30 p.m., followed by Holy Communion. The subject of the sermon will be "The Believer's Hope of Heaven." There will be a children's service in the morning at 11 a.m. to which the parents and friends are cordially invited.

J. J. Ritchie was a tripper to Edmonton on Sunday, as also was Mr J. Kaine.

Mrs Ed Davis was a visitor to the big city on Sunday's train, accompanied by her little son. Mrs F. Small also travelled with her.

Andrew Martin arrived in town from Edmonton on Saturday, and while here will erect a big barn for his brother Johnston Martin east of town.

Posters will soon be out announcing the big Patriotic Celebration. Talk it up, and let's all help to make the day a red-letter one.

W. McKay goes to Edgerton this week where he will be engaged in erecting a number of buildings for the Imperial Lumber Co. at that point.

Alex. Nesbitt was busy on Monday afternoon putting one of the sick buffalo at the park in a better condition to "receive visitors"—stuffed and mounted.

Much good work continues to be accomplished by the local Daughters of the Empire at their knitting circles. A large number of ladies gathered on Wednesday last at the home of Mrs F. Small, and today Mrs Washburn will have an open house for the same cause.

THE ONLY WAY TO DO IT

I asked eight dollars and a half
For one fine black Polled Angus calf.
Which price was not to high;
I hooded it west, I hooded it East,
Endeavouring to sell the best,
But no one wished to buy.

Day after day I toiled along,
And horded men with the same old
"I have a calf for sale;
I ask eight bones and fifty cents
For this unequalled critter, gentls,
Who will dig up the kale"

Then said a friend, "O rest your feet,
And quit your wearing out the street!
And howling by the year;
Spend fifty cents and advertise,
Your saved-off cow, of pocket size,
And buyers will appear.

I followed up this sane advice,
And put my poor tired feet on ice;
And when the Ad. appeared;
Ten customers came to my gate, [freight
One bought the calf and paid the
The others bucked and reared.

And thus, by printing little Ads.,
The wide man gathers in the Leads,
And rests his aching corns,
A little Ad. will make more noise,
Than fifty-seven busy boys,
All tooting on their horns. —Ex.

GILT EDGE U.F.A. ANNOUNCING BIG PICNIC

The Gilt Edge U.F.A. wish to announce to the public that they will hold their fourth annual picnic on Thursday June 22, 1916 at the Gilt Edge School. The picnic is to be a basket picnic, and all are asked to bring their baskets with them. Coffee will be furnished free of charge to all who wish it. For those who come without baskets they will be able to procure light refreshments at one of the booths for a small sum. There will also be a booth at which candy, ice cream, cigars and other treats may be had.

Horse racing for those who have animals they wish to enter in the various events.

Foot races for the young and old. Great interest is being taken in the foot race to be run by two old timers in the district.

Also a ball game between the married men and the single men is causing more or less comment due to the fact that single men are getting scarce in Gilt Edge, and if Cupid keeps on at his present rate the married men will soon have to play their own teams.

MONEY TO LOAN!

On Improved Farm Lands at 8 p.c.

This is the time of the year when loans are most easily placed. The loan companies have plenty of money and inspectors can see your farm. Have exclusive agency for a number of good companies, who want to place loans in the district. Have also private funds to invest at 9 and 10 p.c. Your application is solicited.

GREENSHIELD GLEANINGS

Miss Lundy of Arm Luke spent a few days with Miss G White last week.

Mr Dockstader and wife have gone north in search of a homestead.

C. Stouffer has been engaged in brush cutting on the road allowance between 12 and 7.

Will White left for Edmonton, on Wednesday where he will join the colors in the cause of Empire.

TENDERS

School Buildings

Tenders will be received by the undersigned up to June 30th, for the erection of a frame School House and Outbuilding, according to Design A 1 (without save-troughing) as approved by the Department of Education, for the House Lake S.D., five miles south-east of Green shield, work to be completed by September 1st.

Plans and specifications may be seen at the office of the Wainwright Star. Tenders are also requested to submit a separate tender for a stable to accommodate eight horses. Give simple sketch. All tenders must be accompanied by a marked cheque for Ten per cent of the contract price.

The lowest or any tender not necessarily accepted.
